

Meeting the trends of tomorrow today!

Lighter, sustainable and 100% recyclable.
Aerofill® – foam replacement of the future.

**100%
recyclable**

**Environment
friendly**

**Flame
retardant**

**Light
weight**

2024 / 2025

Your advantages:

The next pioneering innovation for the automotive industry: TWE's Aerofill® as a foam substitute! With its outstanding advantages such as lower emissions, odor-free use, complete recyclability, absence of harmful chemicals, environmental compatibility and flame-retardant properties, Aerofill® sets new standards.

Use Aerofill® – shape the future of our mobility.

Technical specifications:

Weight range
150 - 750 gsm

Thickness range
5 - 50 mm

Comp. Strength
1 - 12 kPa

Air permeability
1500 - 6.000 l/m²s

**Sustainable foam
replacement**

Further details:

- Excellent climate comfort
- Molding and Lamination possible
- Wide range of applications
(also outside the automotive industry)
- Production of roll goods and blanks
