

Customized solutions for your automotive applications

Fulfillment of all common industry requirements.

Customized

Efficient

Long-lasting

2024 / 2025

Your advantages:

Our product portfolio offers first-class velour surface materials that are available in various colors, but also meet common requirements such as abrasion and color fastness. Our renowned customers rely on our quality and innovative multi-layer structure, which offers velour and substrate from a single source.

Custom velour materials

- Multiple materials can be added to backside (*Nonwoven and PVC*)
- PET and PP mixture (*Mono materials possible*)

Weight range
200 - 800 gsm

Thickness range
1.90 - 4.50 mm

Multiple
layers possible

We also enable individual customization by finishing nonwovens, such as PSA or EVA hotmelt coatings e.g. for anti-slip and bonding applications.

Custom Nonwoven finishing

- Different cover layers such as membranes, fabric, spunbond and meltblown are also possible
- Wide weight range for nonwovens

Applied weights
5 - 100 gsm

Layer lamination
15 - 100 µm
