

QuietWeb® – Weight saving combined with outstanding acoustic absorption!

Recyclable

100% Polyester

Flame retardant

Light weight

2024 / 2025

Your advantages:

QuietWeb® is an ultralight, acoustically high effective absorber material made from 100% polyester fibers that is easy to mold and weld. It is used in almost every area of the car. The possibility to make the nonwoven water-repellent or flame-retardant also allows applications in the exterior or engine compartment.

Specifications:

Excellent acoustic and thermal comfort

Mouldable

Barely VOC's

Weight range
200 - 600 gsm

Thickness range
10 - 40 mm

Acoustic results (QuietWeb® 15 mm / 350 gsm)
